Art Unit: 1774

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Dudek on April 19, 2004.

The application has been amended as follows:

In claim 1, on line 8, following "or less", --by weight-- has been added.

Claims 9 and 10 have been rejoined for allowance.

Claims 12 and 13 have been canceled.

The allowed claims are 1-4, 9 and 10.

2. The following is an examiner's statement of reasons for allowance: The examiner has carefully reconsidered applicants' arguments and the claims. In the responses of July 28, 2003 and January 22, 2004, applicants' argued that the substrate would be subjected to simultaneous pressure and heat above its fusion temperature in order to fuse it to the ink receiving layer as recited by claim 1. This process, which fuses the substrate to the ink receiving layer, would render a substrate impermeable to air or gas. Ogawa et al. is distinguished from the instantly claimed invention because it teaches away from the use of a gas impermeable support. Ogawa et al. disclose supports at column 6, lines 5-38. The first paragraph concerns paper supports which may be coated or uncoated. In the next paragraph, where the reference discloses the use of synthetic resin for the support, it states that "although the support is usually paper, it

Art Unit: 1774

may be a sheet of fibers of a synthetic resin such as polyethylene, polypropylene, polyester, rayon, or polyurethane, as long as it has air or gas permeability."

Consequently, the only suggestion to use synthetic resin comes in a sentence calling for a sheet of fibers with gas permeability. A structure that includes a fibrous synthetic resin support does not read on the claims, since the instant claim require that the support be fused. For the reasons set forth about, it would not have been obvious to one of ordinary skill in the art to modify Ogawa et al. to obtain the instantly claims structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela Schwartz whose telephone number is (571) 272-1528.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly, can be reached on (571) 272-1526. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
